

TITLE 329 SOLID WASTE MANAGEMENT BOARD

LSA Document #09-206

SUMMARY/RESPONSE TO COMMENTS FROM THE FIRST PUBLIC HEARING

The Indiana Department of Environmental Management (IDEM) held a public hearing on July 21, 2009 to consider preliminary adoption of LSA #09-206. IDEM received comments from the following parties:

Mr. Ernie Smith, Cummins Engine Company

Comment: Was the chromium concentration within the treatment sludge naturally attenuated over time or is there a formal processing procedure in place?

Response: The metals would probably not be attenuated, but the waste is in a corrective action management unit (CAMU) which is a hazardous waste cell built to the hazardous waste landfill standards. Therefore, it is self-contained within the CAMU, and not a threat to the surrounding area.
